

No	Service	Description	Price (EUR per hour)	Price (BGN per hour)
<b>1</b>	<b>Digital transformation support</b>			
1.1	Digital maturity assessment	Diagnosing company's needs and readiness in relation to digital technologies, with a focus on data and AI, providing feedback on its level of maturity	41 €	BGN 80.19
1.2	Digital transformation strategy development	Developing an individual company strategy for data and AI-driven digital transformation, based on maturity assessment and industry domain specifics	41 €	BGN 80.19
1.3	Providing recommendations on technology adoption and monitoring through the digital transformation process	Based on the assessment and strategy goals, evaluating the technological possibilities, providing access to the appropriate technology providers, and supporting step-by-step digitalization processes at each stage	41 €	BGN 80.19
<b>2</b>	<b>Test Before Invest Services</b>			
2.1	Services based on Digital twins	1) Optimization of industrial processes based on Digital Twins; 2) Improving the environment and human interaction through Digital Twin of Industrial Environments; 3) Industrial products customization through creation of products' digital twins	77 €	BGN 150.60
2.2	Services based on Artificial Intelligence, ML/DL and Data Space	1) Assistance in modeling and predicting in the discrete production process; 2) Deep learning quality assurance applications test; 3) Assistance in modeling and analyzing data through AI; 4) Development of various data-based applications	77 €	BGN 150.60
2.3	Modeling, prototyping, and production	1) Support in development with various arrangements of depth in the object; precise micro-cuts; Very-precise etch; 2) 3D modeling and 3D scanning; 3) Virtual prototyping; 4) Validation and optimization of processes for the production	77 €	BGN 150.60
2.4	Analysis, and design of subsystems of the telecommunication infrastructure (IoT)	Testing and analysis of the operability of devices, functional tests, of telecommunication networks and the IoT	51 €	BGN 99.75
2.5	Design and construction of virtual and augmented reality systems	Comprehensive development of interactive applications for VR and AR systems. Specialized consultations for building VR and AR systems and for programming applications and publishing content	51 €	BGN 99.75
2.6	Robot control of various types and classes	Measurement of electromyographic signals from muscle activity	51 €	BGN 99.75
2.7	Protection of information - methods for encryption, authentication, protection	Cybersecurity testing, pen testing, and audits (of web-based systems, platforms, and data infrastructures). Certification of products/services according to ECCS, Information security audits of organizations and business processes	51 €	BGN 99.75
3	Data-driven decision support	Includes services on the creation of digital twins, integrating of public and private data city data space and development of digitalized solutions for urban development	51 €	BGN 99.75
<b>4</b>	<b>Skills development</b>			
4.1	Business requirements gathering and design thinking trainings	Consulting, Design, and Prototyping following Design Thinking methodology	123 €	BGN 240.57
4.2	Trainings on Big Data	Trainings on: 1) Foundations of Big Data; 2) Big Data Value Chain; 3) Big Data Architecture; 4) Data management, organization processing, visualization, exploration; 5) Data sharing	123 €	BGN 240.57
4.3	Trainings on AI	Trainings on AI in practice (Machine Learning and Basic Analytics) and Scalable AI - Machine Learning and Deep Learning	123 €	BGN 240.57
4.4	Training on IoT	Training on Generic IoT architecture and Main IoT applications: wearable, home, smart city, smart environment, and smart enterprise	123 €	BGN 240.57
4.5	Trainings on E-transformation	Trainings on management towards e-transformation and acquiring new skills for successful implementation of e-transformation strategies	123 €	BGN 240.57
4.6	Trainings on 3D Printing technologies	Includes training on 3D modeling and using database creation in one of 14,0 major components - 3D printing	123 €	BGN 240.57
4.7	Design for Manufacturing and Design for Assembling	Includes training on Core skills in modern, information technologies, Industry and Trainings over material selection in virtual and augmented industrial engineering	123 €	BGN 240.57
<b>5</b>	<b>Access to finance services</b>			
5.1	Business development strategy	Support and assistance in 1) Business Plan development; 2) Business plan analysis; 3) Business Development strategy; 4) Innovative business models for e-transformation	123 €	BGN 240.57
5.2	Intellectual assets and company valuation	Support and assistance in: 1) Intellectual assets and company valuation; 2) Intellectual property protection; 3) Patent support	123 €	BGN 240.57
5.3	Support and assistance in Due Diligence process	Support in financial, technical, and legal due diligence; development of questionnaires and scope of the survey	123 €	BGN 240.57
5.4	Investment opportunities	Support for: 1) Business Angels investment pitch; 2) Investment pitch; 3) Investment matchmaking procedures; 4) Business angels and VC Funding; 5) Funding negotiations	123 €	BGN 240.57

5.5	National and European funding opportunities	Support and assistance in: 1) Find Funding opportunities and document preparation for national funding; 2) Finding funding opportunities for international R&D Projects; 3) European funding	123 €	BGN 240.57
<b>6</b>	<b>Partnership Building and matchmaking</b>			
6.1	Matchmaking services	Support to find the most appropriate technology provider, support to find international partners and build reliable partnerships	77 €	BGN 150.60
6.2	Participation in InnovationAmp events (brokerage, matchmaking, workshops, conferences)	Participation in all kinds of events organized by InnovationAmp or a partner organization	77 €	BGN 150.60
6.3	Using the platform for digitalization	Access to and use of the European Platforms for digital transformation and matchmaking, marketplace and additional manufacturing modeling and digitalization tools (RAMP)	170 euro/month	BGN 332.49/month
